The instrument is used as a component part of a particle accelerator system that produces and stores a high-energy electron beam in a storage ring. This electron beam is then manipulated by special magnets in order to produce photon flux in the form of x-rays. This x-ray flux is ultimately used for imaging biological and other materials samples. *Justification for Duty-Free Entry:* There are no instruments of the same general category manufactured in the United States. *Application accepted by Commissioner of Customs:* March 1, 2012.
